EXPERIENCE

J.P. Morgan Chase - Software Engineer

Aug 17' - Present

- Build internal trading tool that complies with EU Mifid Regulation using TypeScript/React/Redux/rxjs
- Lead onboarding and training for pilot users for beta release
- Coordinate with development, business, and UX teams to create new user requirements and write JIRA stories based on feedback from users
- Plan delivery roadmap schedule for upcoming releases

CAPCO - Software Engineer / Consultant

Jul 14' - Aug 17'

- Built front-end portion of B2B app for largest mortgage lender in the U.S (backbone.js, marionette.js, require.js, angular.js)
- Provide development support for testing teams and consult on design and UX matters to clients
- Played vital role in transforming SDLC process for major banks to Agile
- Developed rapid prototypes for POC's in multiple winning contracts
- Java Spring/Hibernate Development for REST API Service Development

KINDRED DEVELOPMENT - Full Stack Web Developer

Mar 14' - Jul 14'

- Front-End/UI developing using front-end UI frameworks (Angular.js)
- Rails and Wordpress development, creating new sites, web applications, and mobile applications
- Ensure smooth communication with clients as well as obtaining clarity for business requirements
- Translate PSD to HTML/CSS/Javascript
- Work with E-Commerce platforms such as Light Speed and Shopify

SONY MUSIC ENTERTAINMENT - New Release Planner

May 12' - Sep 13'

- Oversaw pricing and data validation, which included monitoring applicable data points associated to products in solicitation and worked with labels, supply chain and sales to implement corrections
- Managed and maintained semi-automated new release setup sheets for account reps. Backed-up the Senior Director of Sales Programs who manages requests for all national and customer specific deals
- Gained a strong knowledge of all upstream source data systems, the downstream data used by the recipients, and trouble-shooting all problems that occur within that pipeline as they arise

DENTIUM AMERICA - Marketing Manager

Oct 11' - May 12'

- Managed marketing budgets, which consisted of allocating funds for symposiums and seminars, exhibitions and trade shows
- Orchestrated and oversaw clinical studies and trial surgeries performed by major universities on the usage of Dentium's biomedical products as well as managed research publications
- Created pricing strategies and promotional packages based on market analysis and profitability reports

AVIS BUDGET GROUP - Revenue Analyst

Dec 10' - Oct 11'

- Analyzed account performance as well as competitor, historical, and market segment data to provide actionable recommendations and forecasting for senior management
- Provided effective support to global sales agents and sales department through billing reconciliation as well as market and competitor analysis
- Stewarded and managed over \$231 million worth of revenue and drove \$31 million in incremental revenue through pricing strategy optimizations
